

Convolute Wheels

XL3 - (10-Hardness) Newest & longest lasting wheel. Offers superior durability and edge retention. Great for tough burs and sharp edges. Our most durable wheel.

XL2 - (9-Hardness) Good wheel for heavy deburring on all materials. Special resin/lubricant makes this wheel ideal for exotic materials such as Stainless Steel, Inconel, Titanium or Cobalt/Chrome - will not smear.

XL - (8-Hardness) Best wheel for medium deburring, blending and polishing on all types of metals, composites and glass. Softer & more forgiving than XL2. More durable than light deburring wheels (LDW).

LDW - (7 Hardness) Best wheel for light deburring, blending and polishing. Softer than XL or XL2 wheels, they will greatly reduce gouging and unnecessary metal

XL3 Competitive Products:

3M: EXL-XP

XL2 Competitive Products:

3M: EX2 & EX3

Norton: Series 4000

Standard: Deburring Wh. (10 Density)

XL Competitive Products:

3M: EXL

Norton: Series 1000

Standard: Deburring Wh. (8/9 Density)

LDW Competitive Products

3M: Light Deburring

Norton: Series 2000

Standard: General Purpose
