

Ceramic Plus Flap Discs

Fiberglass Backing Plate - wears away as flaps wear.

Benefits of Ceramic Plus Flap Discs:

Provide fastest stock removal & longest life of all flap discs.

Extra top coating provides cool grinding with less discoloration of work piece. Top coat also reduces loading & glazing.

Mini Flap Discs - Flex-Edge

Our mini flap discs can be used on existing quick-lock holders. Their layered construction allows them to outlast numerous conventional quick-lock discs. The flexible edge enhances blending & polishing applications.

Std. Pkg. 10

Zirc Flap Discs

Fiberglass Backing Plate - wears away as flaps wear.

Standard-Density discs are very compact - making them the stiffest & most aggressive!

Type 29 (angled face): Built-in angle for increased contact area.

Hi-Density discs provide more of a "cushioned" grinding effect. They can either be aggressive with pressure, or they can blend when used with lighter pressure.

Type 27 (flat face): More forgiving than Type 29 wheels. Best for producing smoother finishes.

PREMIUM ZIRC : BEST CHOICE FOR *CARBON STEELS*. Works well on most other materials, including stainless.

S.S. ZIRC : BETTER CHOICE FOR *STAINLESS STEEL*. Works well on most other materials - including carbon steel.
