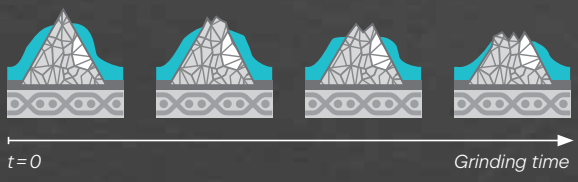
ACTIROX

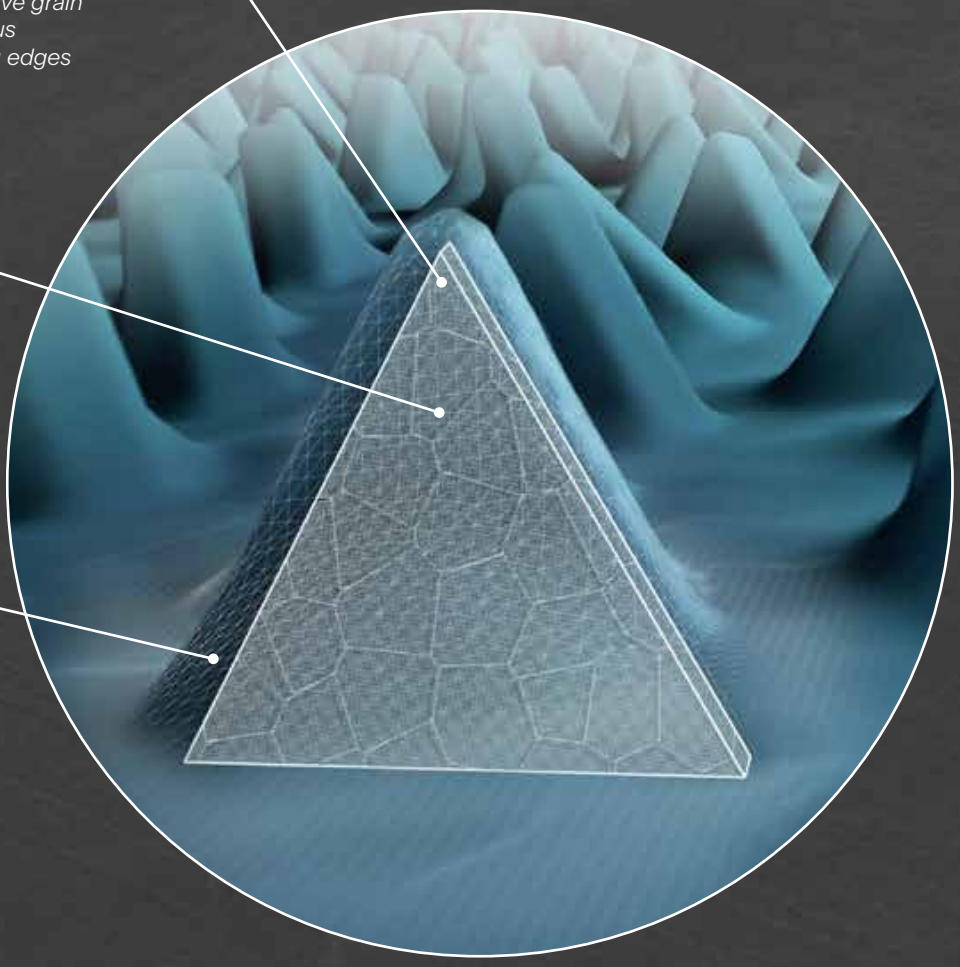
For many years, ceramic grain abrasives have been synonymous with very high stock removal rates and a long service life: this is partly thanks to their unique self-sharpening effect.

ACTIROX is the name of the latest generation of abrasives for optimal stock removal. Thanks to the geometrically shaped abrasive grains, it achieves very aggressive, quick grinding for maximum removal rates.



The geometrically shaped ceramic abrasive grain breaks down in a defined manner and thus continuously produces new sharp cutting edges

Aligned abrasive grain for aggressive and faster grinding

TOP SIZE


Enhanced machining capacity and reduced temperature in the grinding area thanks to the TOP SIZE grinding-active additional layer
